Conversion & Technical Performance Matrix

CORE METRIC / INSPECTION	MEASURED	INDUSTRY TARGET	IMPACT LEVEL
Largest Contentful Paint (LCP)	4.3s	< 1.8s (Google)	HIGH FRICTION
Schema.org LocalBusiness JSON-LD	Not Found	Rich Snippets Active	REVENUE LOSS
Mobile 1-Tap Click-to-Call Link	Missing / Hidden	Sticky 1-Tap CTA	LEAD LEAK
OpenGraph Social Share Cards	Incomplete	Rich WhatsApp Preview	ACTION NEEDED

Top 3 High-Impact Developer Quick Fixes

Action Step 01: Inject JSON-LD LocalBusiness schema with service catalog & opening hours

Estimated Dev Time: < 15 mins • Business Impact: Prevents mobile visitor bounce & boosts rich search rank.

Action Step 02: Implement floating/sticky click-to-call button for instant mobile dial

Estimated Dev Time: < 15 mins • Business Impact: Prevents mobile visitor bounce & boosts rich search rank.

Action Step 03: Embed 3-field fast estimate form (Name, Phone, Service)

Estimated Dev Time: < 15 mins • Business Impact: Prevents mobile visitor bounce & boosts rich search rank.

Strategic Assessment & Implementation Support

Resolving these 3 friction points will drop your mobile render time below 1.5s and prevent lost calls.
